PROFILE

A highly experienced **Senior Software Engineer & AI Full-Stack Developer** with over 12 years of experience delivering scalable, high-performance web and AI-driven applications. Demonstrates strong expertise across React, modern JavaScript frameworks, and enterprise integrations, combined with advanced knowledge of AI/LLM systems including RAG, LangChain and Azure OpenAI. Proven track record of delivering end-to-end solutions across banking, e-commerce and AI platforms, with a strong focus on performance optimisation, secure development (OWASP), and user-centric design. A collaborative and results-driven professional with experience mentoring teams, leading projects, and driving innovation through cutting-edge technologies.

KEY SKILLS

Technical & Development

- React.js, Angular, TypeScript, JavaScript
- Node, Nest JS
- Python, Fast API
- Microservices Architecture
- AWS (EC2, S3, Lambda), CI/CD, Git,
- Docker,

Engineering & Delivery

- Performance Optimisation
- Secure Development (OWASP)
- Agile / Scrum Delivery
- Stakeholder Collaboration & Cross-functional Leadership

AI & Advanced Technologies

- AI / LLM Systems, RAG (Retrieval-Augmented Generation)
- Azure OpenAI, LangChain
- NLP & Intent Detection
- Agentic AI ,MCP

Testing & QA

- Jest, React Testing Library
- Cypress, Playwright, Selenium

CAREER EXPERIENCE

Senior Software Engineer – Publicis Sapient ,London

Nov 2017 – Present

- Designed and developed scalable, responsive web applications using React and modern JavaScript frameworks
- Built reusable UI components and implemented state management (Redux, Context API)
- Integrated front-end systems with RESTful APIs and backend services
- Collaborated with cross-functional teams (product, design, backend) to deliver high-quality solutions
- Enforced code quality standards and security best practices (OWASP)

KEY PROJECTS

Agentic AI Engineer – Eli Lilly (ECMI Platform)

- Built an AI-driven Competitive Media Intelligence platform for analysing media, assets, and social data
- Delivered features including spend analysis, asset libraries, and video decomposition
- Enabled AI-generated insights and alerts for business users
- Integrated frontend and backend systems across distributed teams

AI Full Stack Engineer – AI-Powered Figma Plugin

- Designed NLP-driven workflows converting natural language into structured UI designs
- Implemented intent detection and component mapping to design systems
- Leveraged GPT for automated UI generation and conversational design updates

AI Full Stack Engineer – Backlog GPT (Nissan)

- Developed a generative AI tool to create epics, user stories, and tasks automatically
- Integrated OpenAI APIs for intelligent backlog generation
- Built Jira integrations for workflow automation
- Led frontend architecture using Next.js and mentored developers

AI Product Review Intelligence System (Hackathon)

- Built an LLM-powered system to analyse large-scale product reviews
- Implemented RAG pipelines for improved accuracy and contextual insights
- Generated structured outputs for product intelligence use cases

Senior Software Engineer – Lloyds Banking Group (Commercial Banking)

- Architected micro-frontend solutions for scalable, independently deployable modules
- Worked within Nx monorepo architecture managing shared libraries and builds
- Developed reusable, standardised UI component libraries
- Ensured accessibility compliance (WCAG standards)
- Built dynamic quote generation systems with PDF output

Front-End Lead – Marks & Spencer International

- Led frontend development for global e-commerce platform
- Delivered high-performance UI for product listing and product detail pages (PLP/PDP)
- Improved page load speed and overall user experience
- Led sprint planning, delivery, and mentoring of team members

Senior Software Engineer – Magic Software PVT LTD,

Mar 2017 – Nov 2017

- Developed frontend applications for Pearson using AngularJS and JavaScript
- Built interactive digital learning and lab environments
- Worked within Agile/Scrum frameworks for timely delivery

Consultant – Front-End Technology – Emeis Technology PVT LTD,

Apr 2015 – Mar 2017

- Developed UI modules including questionnaire systems and activity logs
- Used Knockout.js, jQuery, and HTML5 for frontend development
- Wrote unit tests using Jasmine
- Ensured code quality using SonarQube

UI Developer – Sparx IT Solutions PVT LTD,

Dec 2013 – Apr 2015

- Built responsive UIs using AngularJS, HTML5, CSS3, Bootstrap
- Delivered dashboard modules and client-facing interfaces
- Participated in requirements gathering, estimation, and sprint delivery

UI Developer – Creative Web Logix PVT LTD

Dec 2012 – Nov 2013

- Developed and maintained UI components using JavaScript and jQuery
- Delivered interactive frontend solutions and reusable components

EDUCATION & CERTIFICATIONS

Bachelor of Technology (Information Technology), Rajasthan Technical University, India

- AWS Certified Cloud Practitioner (2023)
- AWS Solutions Architect – Associate
- MongoDB SI Associate Certification
- Azure AI / Cloud AI Certification (In Progress)
